

WEAVE-STUDY LOOP • Shared Study Space

A3 booklet • concept package / provisional geometry
Three learning nodes: HALL • VALLEY • NIGHT Room

Approximate human-facing metrics: ~1,140 ha • ~12% green • ~0.5% public-space

Participant provisional model • not officially issued • recompute after official geometry/data

Concept suggestion and reference material only; professional and human review remains required.

STU • JZ spatial loop

Three provisional nodes • route • operation

learning route • public-space interface • quarterly review

PROVISIONAL CONCEPT — not an official boundary; verify after official data

Three node prototypes

A service chain with a visible exit, privacy boundary, and human fallback at every node.

HALL / 织学馆

Shared-study hub • quiet pods

Scenario anchors: SC-01 / SC-02 / SC-06

- Exit: stop or hand over when safety or service gates fail
- Privacy: aggregate booking fulfilment only; no individual tracking
- Human fallback: paper booking + staffed desk

VALLEY / 学研谷

Study community • workshop + forum

Scenario anchors: SC-03 / SC-05 / SC-09

- Exit: pause the pilot when complaints stay unresolved
- Privacy: anonymised ranges; no person-level profiling
- Human fallback: walk-in sign-up + staffed host

NIGHT / 夜读室

Evening study • help point + classes

Scenario anchors: SC-07 / SC-08 / SC-10

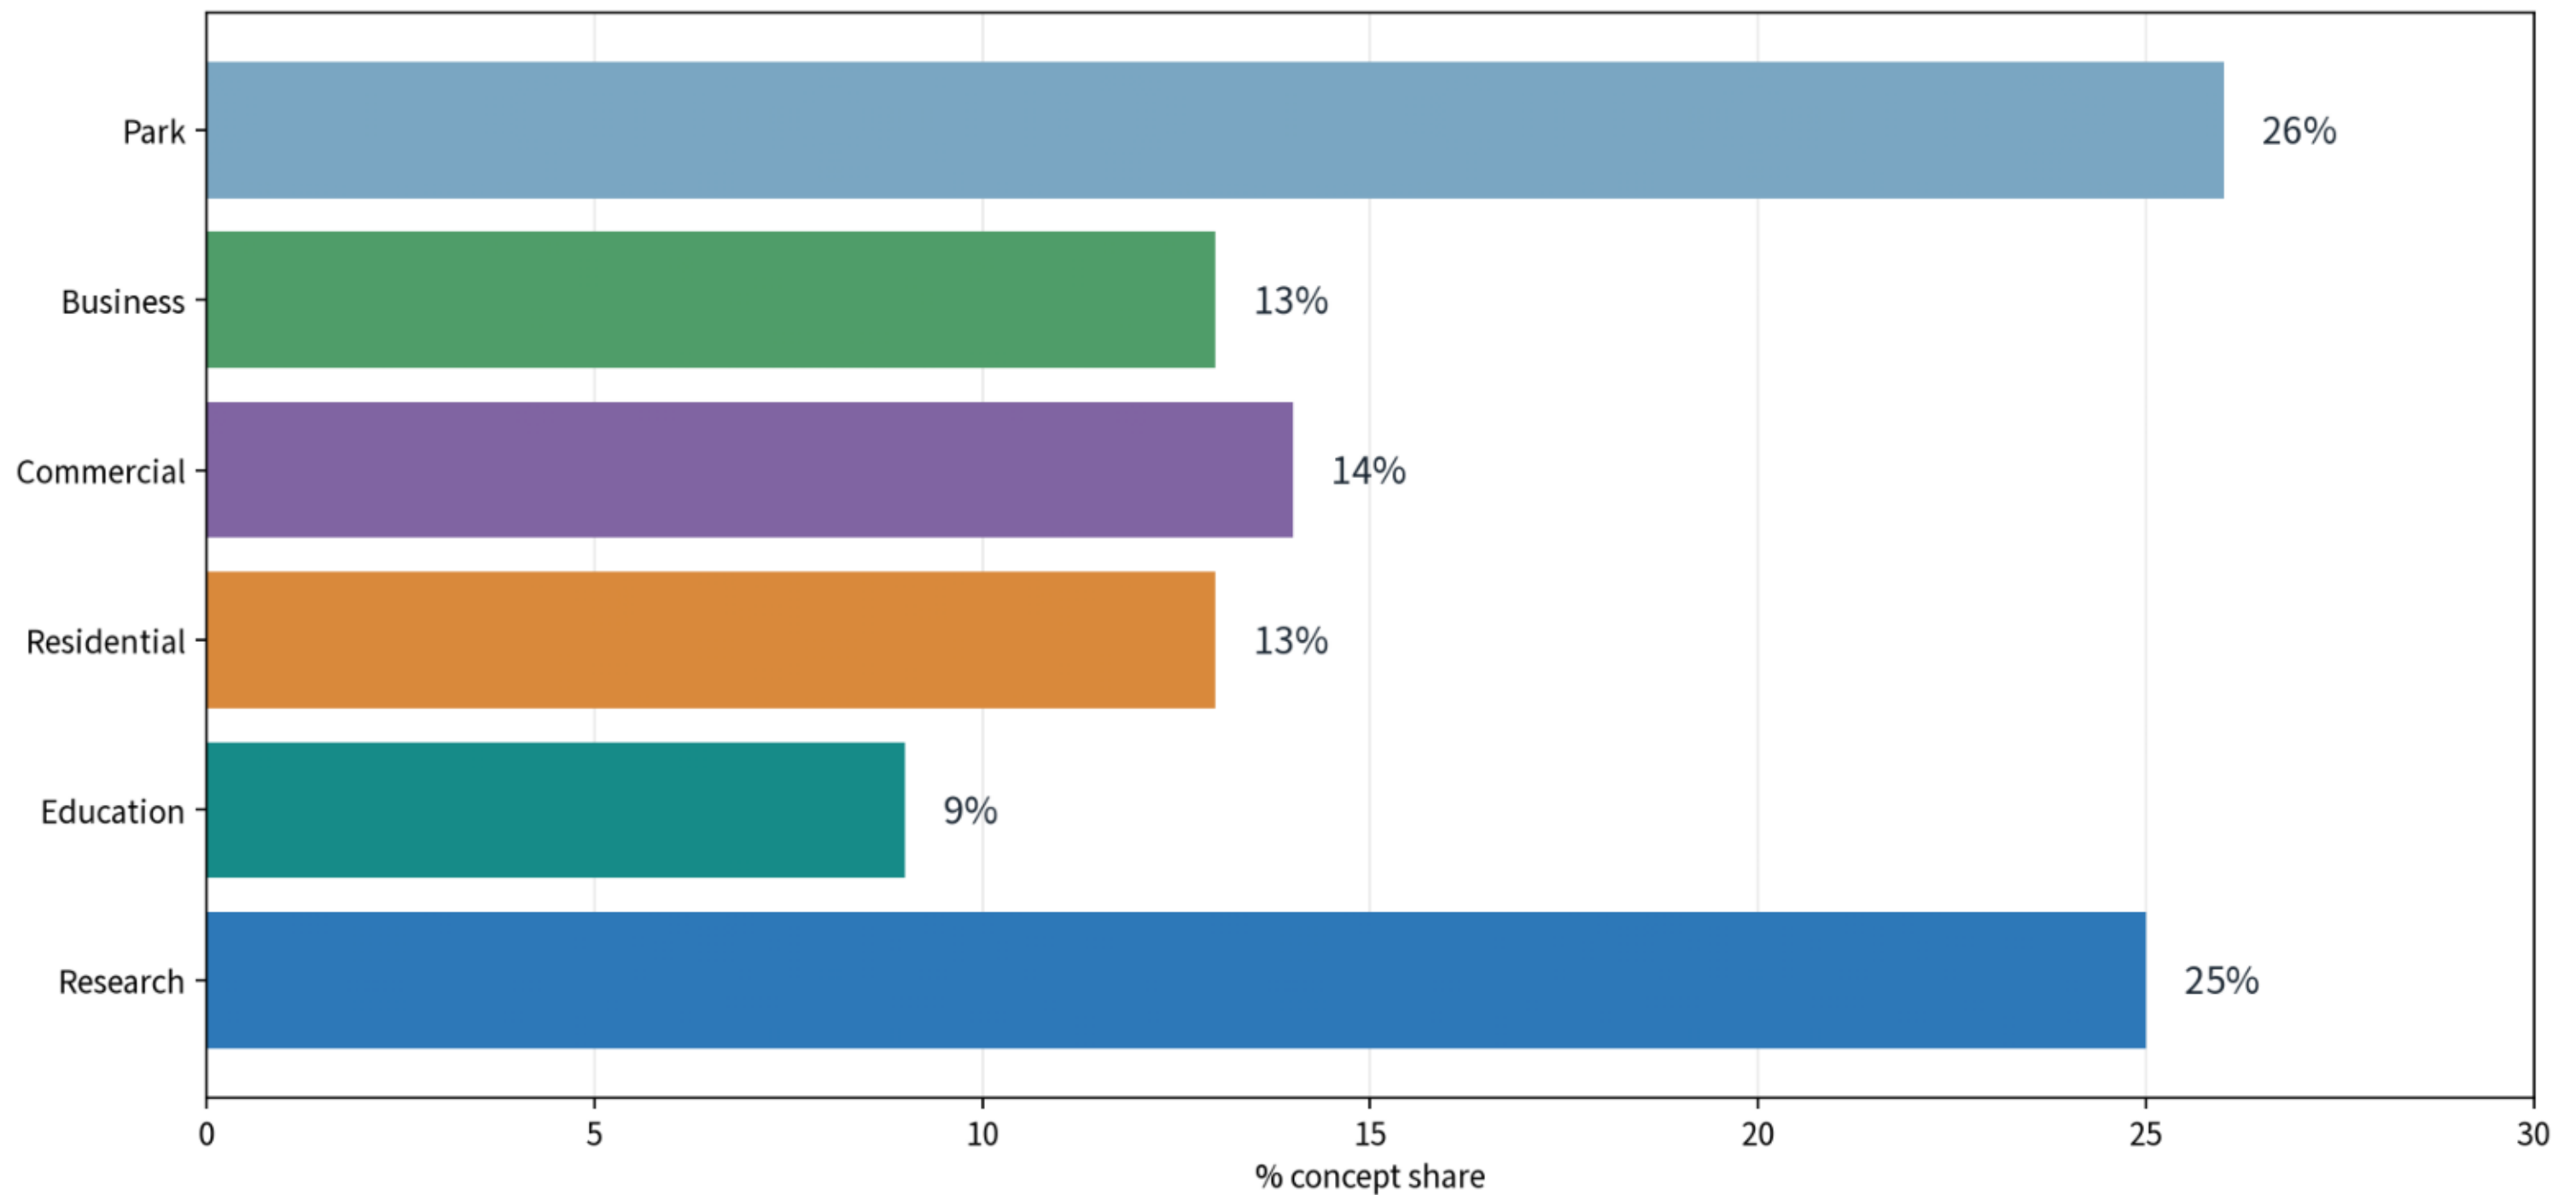

- Exit: close the night slot if duty or safety preconditions fail
- Privacy: public-area safety review; no identity tracking
- Human fallback: phone/help desk + paper route

PROVISIONAL • participant model • not officially issued • recompute after official geometry/data

Node envelopes are conceptual; all operations remain subject to professional and human review.

Concept land-use structure

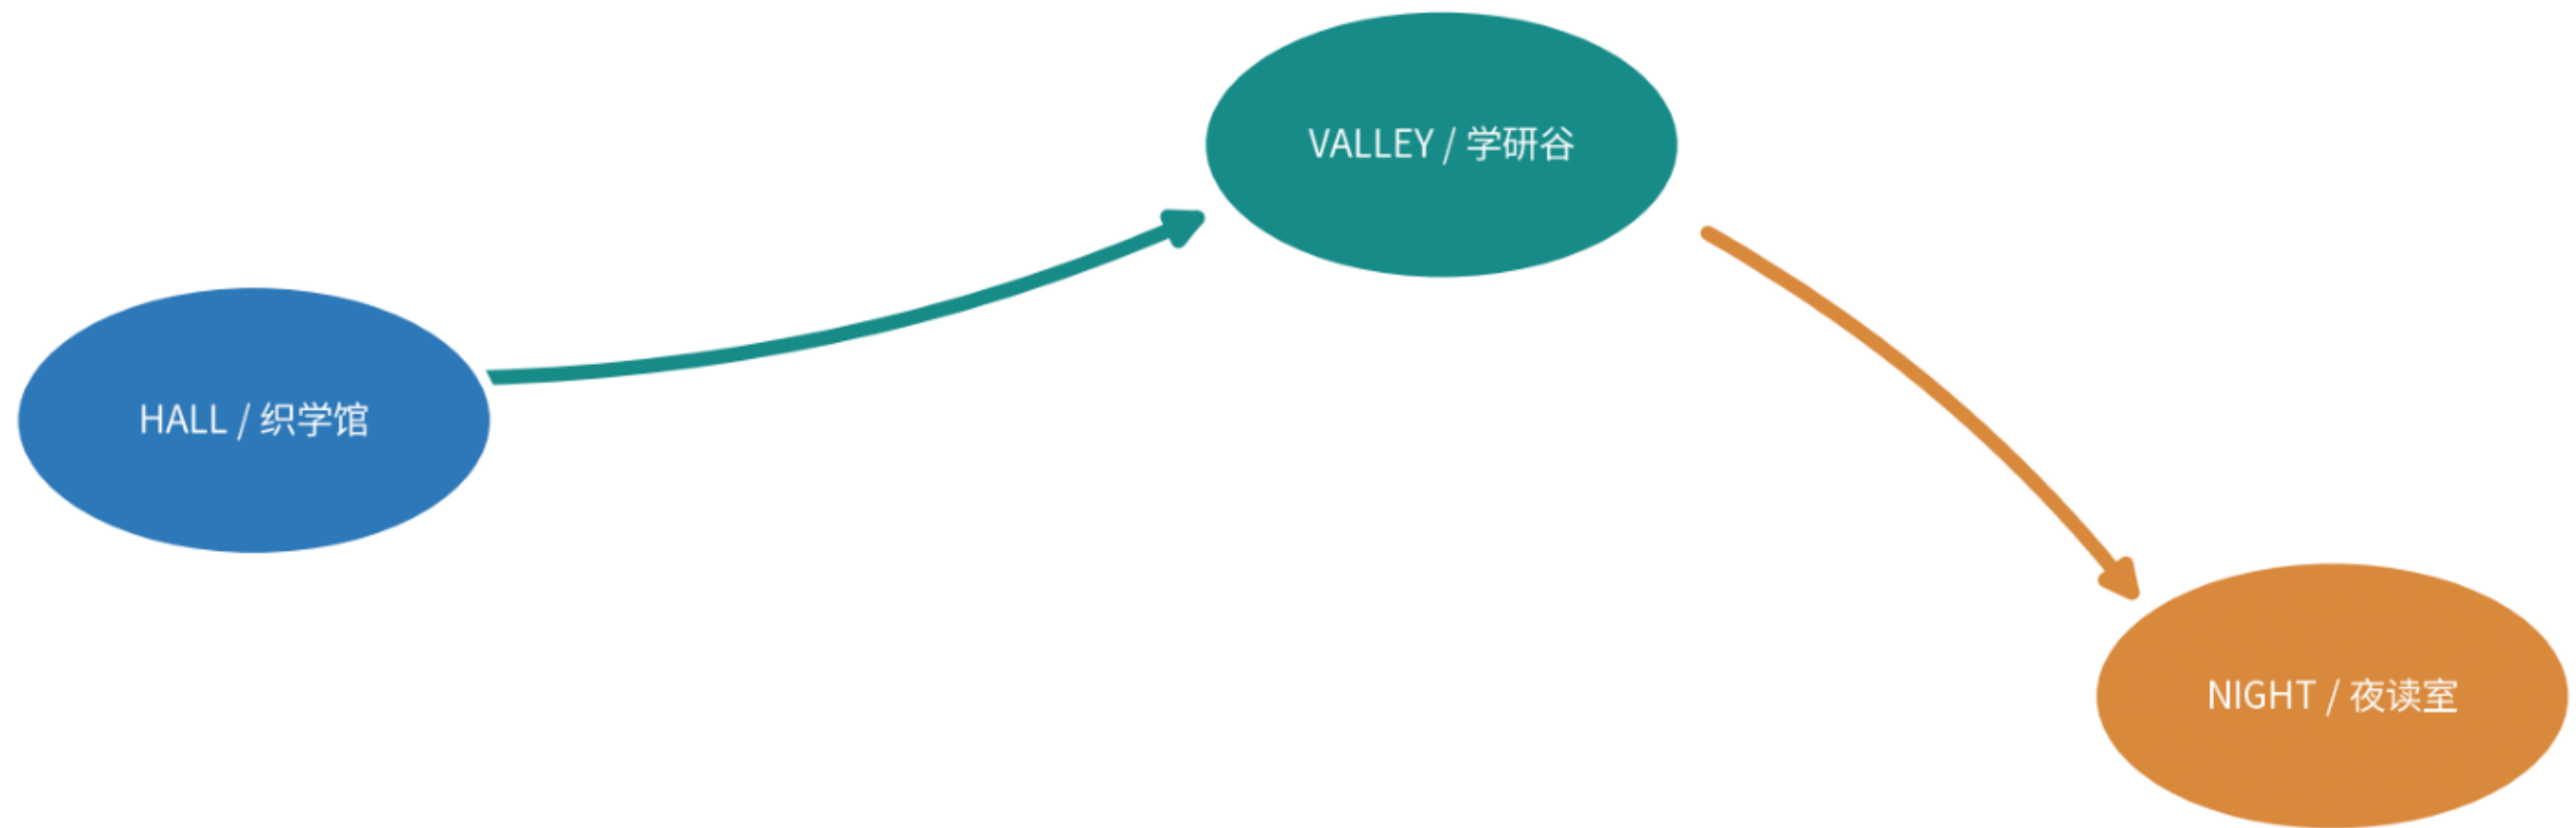

Six classes; approximate shares are scenario targets, not statutory controls

Source: provisional land-use geometry • recompute after official data

Slow-mobility and blue-green loop

Route logic, not a road or rail engineering proposal

shade • reading edge • accessible pause • help point

Provisional route; official rail, fire, heritage and municipal conditions govern any later study

Core metric evidence

Human-facing values are deliberately approximate; machine precision stays in metrics.json.

Overall design area

~1,140 ha
(~11 sq km level)

Green ratio

~12%

Public-space ratio

~0.5%

Count metrics

PROVISIONAL • participant model • not officially issued • recompute after official geometry/data

Formal area/ratio values are geometry-derived; no planning precision is implied.

Seven-factor AI learning ecosystem

Space is the public carrier; human review is the gate

Concept capability map; no enterprise, funding, capacity or deployment claim
