route

3.0 m CONTINUOUS CLEAR ROUTE | PEOPLE FIRST

No furniture, equipment, cable or robot may enter

CONCEPT RELATION · NO SET-OUT

01

Protect people first

The 3.0 m concept clear route stays continuous; robots, equipment and cables remain outside.

02

AI and humans open together

If the desk fails, use human phone/text backup; if both human paths fail, AI closes too.

03

Field evidence is still blank

Capacity null; zero field-verified egress routes; seventeen roles unappointed.

04

Failure pauses by default

Any group safety-critical failure, missing equivalent or failed exit keeps the whole unit on HOLD.

This quick-read figure answers public decisions only; dimensions, sections, tasks, BOQ and acceptance remain in professional evidence T03/T05 and the workbook.

PROFESSIONAL EVIDENCE T05 / v1.6

B | FIELD BASELINE REQUIRED: wheelchair, low vision,
no-smartphone time, human response, conflicts, noise,
lighting, drainage, microclimate, residents, roster, actual cost.

Any group safety-critical failure, missing equivalent, or failed
exit => whole unit HOLD; no averaging away failure.

SITE GROUNDING / REPRESENTATIVE SEGMENT

VERIFY ORIENTATION, THEN ADD THE DESIGN

Representative segment | orientation + text-only facts + reversible overlay

A ACTUAL ORIENTATION

OSM orientation base. Orange band marks the representative study segment—not a red line or exact site.

B TEXT-ONLY WORKING SKELETON

Published facts translated into a diagram

NOT AN EXISTING-CONDITIONS SURVEY. Orientation and published text only.

C REVERSIBLE OVERLAY | NOT APPROVED

Actual sling still requires survey, tenure, mobility, heritage and operating approval.

Orientation/data: © OpenStreetMap contributors (ODbL), snapshot 2026-08-29. Text facts: Beijing Municipal Government report, 2026-07-30. Not a survey.

THE SLOW LINE | Keep pace with the slowest person

Not slower innovation: a city latency budget for safety, comprehension and choice

01

ONE LINE · THREE YARDS · SIX ALL-STOP GATES

Dashed = repository provisional envelope; not the real park alignment or planning boundary

SLOWEST-USER TEST · SUT-6

MOBILITY · wheelchairs & slow walkers

SENSORY · low vision & hearing loss

DIGITAL · no phone, no account

LANGUAGE · children & newcomers

CARE · carers & strollers

TIME · night and shift workers

EVERY-STOP CONTRACT

purpose → slowest user → non-AI equivalent → human takeover → minimum data → physical stop → appeal → public review

FROM STRATEGY TO GROUND: THREE LEVELS, ONE DECISION CHAIN 02

43.6 km² research → 11.4 km² provisional container → three transferable prototypes

43.6 km²

RESEARCH: put slowest-first into industry, talent and governance

11.4 km²

OVERALL DESIGN: one Slow Line and six all-stop gates

3 AREAS

KEY DESIGN: Safe-Speed, No-Login, Every-Stop

CONCEPT LAND USE | RECOMPUTABLE

Concept only · replace when official controls arrive

ONE MAP: SPACE × SERVICE × OPERATIONS

SPACE

- continuous accessible line
- six cross-city gates
- three reversible yards

SERVICE

- works without login
- a human is findable
- non-AI path is equivalent

OPERATE

- pilot before building
- failure defaults to stop
- publish review before scale

Official geometry → replace constraints → regenerate all layers, metrics, figures and PDFs

MOBILITY + BLUE-GREEN: THE FASTEST SYSTEM MUST WAIT 04

continuity, crossings, rest, help and stop authority before spectacle

CONCEPT NETWORK — NOT ROAD OR PARK ALIGNMENT

FIVE PERFORMANCE GATES

01 STEP-FREE CONTINUITY

detours do not count as access

02 REST + SHADE

spacing tested by slowest users

03 MULTI-SENSORY

visual, audio and tactile

04 HUMAN IS FINDABLE

on-site, phone and paper

05 ROBOTS CAN STOP

physical stop beats inference

NO SITE BASELINE: thresholds require co-design and professional review
