Concept Proposal

Provisional rough boundary · official_boundary=false

CONCEPTUAL SUGGESTION

COMMUNITY-DISPLAY-ONLY

ZIPPER JINGZHANG

2026-08 · A3 Album 01 / 09

PROBLEM & MECHANISM • FROM GAPS TO ZIPPER

Three gaps today, one zipper closes them

Today • Three Gaps

- ① **Corridor severance** — the rail corridor cuts across the site, severing north–south slow connections
- ② **Supply mismatch** — space and demand misaligned along the line; public space only 0.8%
- ③ **Heritage isolation** — the century-old Jing-Zhang heritage fenced off and divided by level differences

Mechanism • Three Parts

- **Chain Band • 9.72 km green axis** green_axis 9,716.12 m — the slow-traffic spine linking the three cores
- **Chain Teeth • rail-crossing nodes** — ten crossings, each in its own way
- **Zipper Head • intelligent operations system** — AI scheduling zips the chain every day

Zipper Jingzhang

Fig. P2-1 | Chain Band panorama, memorial mode: deck plates flip open to reveal the track bed, holographic light train (AI-generated concept render)

Conceptual suggestion, not statutory planning or an implementation commitment.

Zipper Jingzhang

ONE BAND, THREE CORES, TEN TEETH

One Band · Three Cores · Ten Teeth

Band · Chain Band

- ① **9.72 km green axis** — heritage-park band stitching walking, cycling, vehicular, unmanned, municipal and ecological links
green_axis 9,716.12 m

Cores · Three Key Areas

- **A1 Zhongzhiyuan · garden-type** — full-stack independent innovation and open testing
- **A2 Beijing AI Origin Community · campus-adjacent** — research commercialization and talent community
- **A3 Dazhongsi · urban-type** — AI-native formats and international exchange

Ten Teeth · Chain Teeth

- ② **Z-01–Z-10 ten rail-crossing nodes** — zipped for the everyday city, unzipped to reveal the track bed

Conceptual suggestion, not statutory planning or an implementation commitment.

LAND USE & MOBILITY

Land Use & Mobility

Land Use • 44 Parcels

- ① **Zero overlap, full coverage** — 44 parcels subdivide the site completely (gap < 1 m², overlap pairs = 0); adjacent parcels share boundary coordinates
- ② **Differentiated core ratios** — A1 garden-type (R&D 38% + park 22% + reserved 22%), A2 campus-adjacent (education 28% + R&D 26% + residential 22% + commercial 16%), A3 urban-type (business & finance 44% + commercial 28% + culture 14%)

Mobility • Crossings Belong to the Teeth

- **Chain Band axis 9.72 km** + 13 east–west micro-circulation streets; roads total 24,928.1 m
- **Cross streets stop at the Chain Band edge** — rail crossings are carried by the Ten Teeth, not at-grade intersections

Land-Use Structure: differentiated supply across three cores

A1 garden-type (R&D + green + reserved test field) | A2 campus-type (education + R&D + housing) | A3 urban-type (business + commerce + culture)

Zipper Jingzhang | provisional rough boundary (official_boundary=false); full recalculation upon official data | values recomputed from submitted geometry in EPSG:4548 | zipper-v2 pipeline 2026-08-10

Fig. P4-1 | Land-use parcels (44 · provisional basis)

Mobility • Blue-Green Public Space System

Crossing strategy: local streets stop at the band edge; east-west links cross via the ten teeth

Zipper Jingzhang | provisional rough boundary (official_boundary=false); full recalculation upon official data | values recomputed from submitted geometry in EPSG:4548 | zipper-v2 pipeline 2026-08-10

Fig. P4-2 | Blue-green network: Chain Band axis + micro-circulation streets (roads 24,928.1 m · provisional basis)

THREE CORES IN DETAIL

Three Cores in Detail

Fig. P5-1 | Key areas plan: A1/A2/A3 with teeth and scenario placement (provisional basis; recalculated once official boundaries are released)

A1 Zhongzhiyuan • Garden-type Full-stack innovation & open testing Strengthen the Qinghe riverfront green space; reserved land hosts a visitable open testing ground. Z-02 chain-tooth footbridge · Z-10 ecological green bridge Scenarios 02★/06/10★	A2 Beijing AI Origin Community • Campus-adjacent Commercialization & talent community Campus–park–street slow-traffic stitching; transfer services and amenities at the crossing flanks. Z-01 crossing ceremony plaza · Z-05 robot passage · Z-09 two-bank street Scenarios 01/07	A3 Dazhongsi • Urban-type AI-native formats & international exchange Station-city integration, four-quadrant walking connectivity; commerce frames the heritage as focal vista. Z-04 arch bridge playground · Z-08 rail-crossing building Scenarios 05/08★/09
---	---	---

TEN TEETH GALLERY (SIX OF TEN • TWO STATES)

Ten Teeth Gallery

Z-01 Crossing Ceremony Plaza • everyday — deck plates flush with rail tops, free crossing (AI-generated concept render)

Z-01 Crossing Ceremony Plaza • memorial — plates flip open to reveal the track bed, a holographic train passes (AI-generated concept render)

Z-06 Drone Corridor • memorial — a hundred-drone light array forms a steam light-train (AI-generated concept render)

Z-07 Utility Tunnel Vertical Crossing — the utility tunnel stitches both banks invisibly beneath the rails (AI-generated concept render)

Z-09 Two-Bank Commercial Street — the railway as a river, both banks as streets; nightscape frames the heritage (AI-generated concept render)

Z-10 Ecological Green Bridge — rabbits and birds cross, green space continuous; nature's return is the deepest memorial (AI-generated concept render)

SCENARIO RENDERS

Scenario Renders

Chain Band panorama • everyday — a flush-deck everyday park, slow traffic and machines passing through (AI-generated concept render)

Chain Band panorama • memorial — plates open revealing the track bed, a holographic light train passing (AI-generated concept render)

A1 Qinghe garden interface — riverfront green space and the open testing ground (AI-generated concept render)

A2 campus tech-transfer street — transfer services and daily amenities at the crossing flanks (AI-generated concept render)

A3 straddle building & station quadrants — the interior passage crosses the rails imperceptibly (AI-generated concept render)

Two-bank commercial street nightscape — commercial vitality framed by the heritage (AI-generated concept render)

METRICS & RENEWAL PROJECTS

13 metrics × 6 renewal projects, all recalculable

Planning metrics · provisional basis

Metric	Value	Recalculation basis
Site area	11,412,825 m²	polygon_area(SITE-001) · EPSG:4548
Green space ratio	18%	green ∩ site / site
Public space ratio	0.8%	public ∩ site / site
Chain Band length	9,716.12 m	length(ROAD-001)
Chain Teeth nodes	10	count(public_space.tooth_id)
Land-use parcels	44	count(land_use); gap<1m²; 0 overlap pairs
Road total length	24,928.1 m	Σ centreline lengths
Building footprint area	2,588,396 m²	Σ building envelopes
Scenario cards	11 (incl. 3★)	count in main text
User personas	5	count in main text
Phases	3	count(PHASE)
FAR	unknown	Official controls missing; not speculated
Key areas	3	count(KEY_AREA) · A1/A2/A3

Key renewal projects · conceptual

ID	Project	Type
JZ-01	Chain Band walking-and-cycling main axis and breakpoint stitching (Z-01/Z-02 first)	Public space / transport
JZ-02	A1 Qinghe low-carbon innovation interface (scenarios 06/10★)	Blue-green / industry
JZ-03	A2 campus-adjacent commercialization street (scenarios 01/07)	Urban renewal / services
JZ-04	A3 station-area four-quadrant pedestrian connectivity (Z-04/Z-08)	Transit integration
JZ-05	Zipper Head intelligent operations system and edge-computing nodes	New infrastructure
JZ-06	Global AI Events Week public route (scenario 11)	Operations / branding

Phasing (conceptual): Phase 1 campus-adjacent launch → Phase 2 station-area → Phase 3 garden; engineering subject to formal regulatory plans and property-rights confirmation.

Metric basis: site-package provisional boundary (official_boundary=false); ~0.1% deviation from the announced value is coarsening error; all geometry and metrics recalculated once official boundaries are released. Conceptual suggestion, not statutory planning or an implementation commitment.

EVIDENCE & COMPLIANCE

Generation evidence chain & recalculation trigger

01 Prompts archived

Per-image generation prompts for the Ten Teeth illustrations archived (Lovart AI free model nano-banana-pro); fully retrievable under assets/media/prompts/ and prompt-*.txt.

02 Generation metadata preserved

IPTC/XMP machine-readable AI markers (trainedAlgorithmicMedia) carried by generated images are **passed through and never stripped**; XMP is carried through JPEG compression as well.

03 Sources & licensing declared

sources.json and copyright_statement proactively register provenance and licensing of all assets; IP jointly shared per Announcement 8.1, licensed COMMUNITY-DISPLAY-ONLY.

04 Full-chain reproducible pipeline

The zipper-v2 pipeline deterministically generates all JSON/HTML and the five required figures; geometry throughout in EPSG:4548 subdivision + set_precision(0.001) grid snapping, formulas and sources in metrics.json.

Recalculation trigger — once official boundaries are released, all geometry and metrics are recalculated and the Chain Band alignment and teeth re-sited. Everything in this album is a **conceptual suggestion, not statutory planning or an implementation commitment**.
